ERNST IRRIGATION

Will a hard hose traveler designed for an agricultural producer work for a municipality? Not necessarily. Based on our 60 years of experience, Ernst Irrigation has designed their travelers with features and options that allow us to customize a machine to fit specific needs. We work **WITH** our customers, and have asked many of them for their participation in designing out systems. The results have been well worth the effort. Clearly, there are many advantages to buying an EHCO hard hose traveler. Since our equipment is manufactured right here in the Northwest, using standard components, service is easily provided. All parts are available close by, and we can assist you immediately if you need help. What's more, our travelers utilize a simple drive system. They're easy to operate and maintain. Each EHCO model comes equipped with a 270-degree turntable, allowing you to irrigate larger areas without moving the unit repeatedly. Plus our units are operable with both fresh water and waste and waste water.

EHCO 110—Frame II
